For Immediate Release

BHK of America Announces New Options for **DuraWrap® Drawer System**

South Boston, VA
BHK of America, a leading manufacturer of quality DuraWrap® and wood drawers and components for the woodworking industry, is pleased to introduce several new colors and textures for its DuraWrap® Drawer System. The new colors — Linen, Taupe and Nickel — [all in an elegant woven texture](#), are part of the BHK Designer Collection and open up exciting new choices and applications to manufacturers and end users. These new designer colors are available in 1/2" and 5/8".

The popular BHK DuraWrap® Drawer System is precision manufactured to customer specifications. These proven BHK drawers are specially sealed in an abrasion resistant DuraWrap® surface that won't come off and is easy to keep clean. The proprietary sealing process ensures surface uniformity without the worry of wrinkles and bubbles or surface edges that peel apart. BHK also offers their Five-day *FastTrack* Program.

Reiner Kamp, President of BHK of America states, "We are very excited to introduce these new colors/textures to the industry. BHK takes pride in offering the industry the latest product innovations and technology, the highest quality, quick turnaround time and a knowledgeable customer service staff." He adds, "We continue to work towards increasing our customers' confidence in the BHK name and product line, and we value each and every customer regardless of size of account."

BHK is on the move! These new colors/textures that are part of the special limited Designer Collection from BHK of America are the first of several other designs that will be available in early 2014. Delivered pre-assembled or ready to assemble for “on the spot” installation, DuraWrap® Drawer Systems are currently available in eight different colors and wood grains, plus the three new additions, for a total of 11 choices. For a sample of the new colors/textures as well as the other eight colors/woodgrains in the DuraWrap® product line, please call 800-724-4212 and speak to a customer service representative.

Since 1976 BHK of America has been one of the most respected US manufacturers of ready-to-assemble (RTA) or pre-assembled drawer systems and components, and is well known in the industry for producing the finest quality products. The manufacturing facility, located in South Boston, VA, provides drawers for almost every industry including kitchen and bath, closets, furniture, office, healthcare and hospitality. Their distributor network covers the US and Canada.
